What are EC Series diesel generators?

EC series diesel generator sets, with a power range from 30kVA - 1500kVA, are powered by a high quality Cummins engine and Stamford alternator. These gensets are reliable and durable, which means that they can be used as prime continuous power supply and also provide stable standby power. All EC series gensets provide three phase output.

How much power does a diesel generator have?

Available in single phase PK model (6.6kVA to 45kVA) or three phase GMS model (10kVA to 45kVA). EC series diesel generator sets, with a power range from 30kVA - 1500kVA, are powered by a high quality Cummins engine and Stamford alternator.

What is a portable enclosed diesel generator?

This Portable Enclosed Diesel Generator is an Ideal Choice for House Solar Backup. A 2 wire auto start/stop module allows this generator to be started automatically by your off-grid power inverter/charger so that you never have to manually start your generator when needed.

Why do you need a diesel generator?

A diesel generator is incredibly versatile and will provide you with standby power, making it ideal to use during outages and emergencies, when you need to power a project off the grid or on water, or any other situation that requires vital power to complete tasks or ensure continuous communication.

What is a diesel generator?

Diesel generators have a different structure of motor compared to other generators, they are manufactured using stronger metals, and they have been specifically designed with larger engines and cooling components. Compact in design so occupy less space. More efficient when it comes to fuel, and typically outputs double the amount of power.
