I recently got the AFERIY Portable Power Station 2400W for both home backup and camping trips, and after putting it to the test, I'm thoroughly impressed with its performance and versatility.. One of the key ...

Solar generators these days use lithium-ion batteries. There are two types: Li-ion NMC and LiFePO4 or lithium iron phosphate. Li-ion NMC batteries are lighter and cheaper. So solar generators using these types of batteries have easier portability. They are great for camping and outdoors. LiFePO4 batteries are heavier but they last much longer.

If your average gas generator costs about \$1000 a similar output solar generator is going to cost you somewhere close to \$2000 - and maybe even more. Solar generators have lower operating costs in the long haul to offset that initial expense, but it still a pretty big hit to your bank account right away.

These include the Solar Generation Project, which is hoping to supply 10 percent of Aruba's electricity by

Solar generator for home inia Aruba
