

Where does Togo get its energy from?

To meet demand, Togo has to import most of its energy from Ghana, Cote D'Ivoire and Nigeria. The country's main source of energy is biomass. About 76% comes from firewood, charcoal and vegetable waste. Petroleum products account for just over a quarter of energy needs, while electricity derived from thermal, hydropower and solar accounts for 4%.

What are energy systems in Togo?

Energy systems in many countries, including Togo, are a balance between energy that's generated centrally at a large scale and energy that's generated at a smaller scale closer to where it's used. Balancing the two sources makes energy supply more reliable and stable.

Will Togo build a solar plant in salimde & awandjelo?

Togo plans to build two more solar plants in the coming years, one in Salimde, (In the Tchaoudjo prefecture) and the other in Awandjelo (Kozah). Last June, the BOAD approved a CFA25 billion financing for the construction of the Awandjelo plant. The latter should generate an additional 42 MWp, and bring renewables' share in Togo's energy mix to 40%.

Does Togo have a potential for wind energy?

Togo's potential for wind energy is not high. Our study also identified a number of challenges with renewable energy, however. For example, the Togolese government needs to determine the generation potential from various renewable energy sources. The head of a renewable energy research centre said:

Which power plant increases Togo's electricity production capacity?

This power plant increases Togo's electricity production capacity by 50%. Blitta Solar Plant The Sheikh Mohamed Bin Zayed solar power plant or Blitta's solar plant (located in the central region, 262 km from Lomé) was built by AMEA Togo Solar, a subsidiary of AMEA Power, and inaugurated in June 2021.

How is rural electricity steered in Togo?

In Togo, rural electricity projects are steered by the Rural Electrification and Renewable Energy Agency. Several companies, including BBOXX, EDF, and Sun King-Soleva, are actively working to promote universal access to electricity by developing innovative technologies and providing solar energy services to communities not connected to the grid.
