The majority of the installation of solar power capacity is seen in Europe and China, whereas countries with the highest potential for solar energy still lag (WEC, 2016).One of the main drivers toward increasing adoption of RE technologies is achieving energy security, especially after the oil crisis in the 1970s, and along with sustainability drivers as seen in the ...

Even if what you do works (sounds risky to me), you won't be subjecting the panel/cells/soldered connections/buswork to actual sunlight and the resultant (significant) heating from it. Most panel failures are due to connections et. al. than the cells themselves. If the panels are cheap enough, just buy "em and suck up the potential bad ones.
