Home appliances: IGBTs are used in appliances like refrigerators, washing machines, and air conditioners to control the speed and power consumption of their motors. Data centers: IGBTs are used in UPS systems and power distribution units in data centers to ensure reliable and efficient power supply to critical equipment.

Metal roofs are the preferred material for the overlay of solar panels, as they last much longer and are easier to seal after panel installation. At least five different companies make solar shingles, such as Tesla, and offer an interesting alternative. These are typically thin-film solar cells made of copper indium gallium selenide.
