A solar installer, roofing expert, or structural engineer can help you determine your roof's solar suitability. It can help to know when your roof was installed or replaced, but if you don't know and can't ask the previous homeowners, your local government should have a record of when it issued the building permit.

Solar type roof design refers to the integration of solar panels into the architecture of a building. This design not only maximizes energy efficiency but also enhances the overall aesthetic appeal of a property. Unlike traditional solar panel installations that sit on top of existing roofs, solar type roof designs incorporate solar technology directly into the roofing ...
