Where should you buy solar panels? Some buy directly from the store, while others get the panels from their electricity company. The potential of solar energy in Finland. Finland may not be the first country that comes to mind when talking about solar energy, but that doesn't mean that the country doesn't have potential in this form of energy.

The state of Finland's solar market Anybody can easily assume that solar is not a feasible option in Finland because of Northern Europe's climatic conditions. Surprisingly, the country is keen to develop its solar capacity albeit the less favorable climatic challenges. Over the last couple of years, the Finnish government has been working to build its renewable energy capacity. So, ...

Even small sauna stoves use 6kW of electricity. You would need quite big array of solar panels for that and a lot of battery capacity for electricity storage. So quite hard to use just solar panels. You would be better of just adding solar panels for your house and heating up sauna with electricity you get from electric company. Or use wood stove.
