

Solgas energy Palestine

Who is Solgas energy?

The company has all the skills and resources required for establishing solar energy systems in-house, ranging from electrical engineers, civil engineers, constructors and licensing professionals. At Solgas Energy we plan, deploy and maintain solar photo-voltaic (PV) systems as comprehensive turnkey solutions.

Is solar energy a reliable source of energy in Palestine?

In Palestine, solar energy is a reliable source of energy due to its high average radiation and sunshine rate per day (Daoud, 2018), Yet, the yearly progress of the solar energy is around 1% only as indicated by the Palestinian Energy Authority (PEA) plan (PEA, 2013). Fig. 1. PV panel project at Palestine Technical University - Kadoorie.

Is Palestine a good place to invest in solar energy?

Palestine has some of the highest rate of solar water heating in the region, and there are a number of solar power projects. A number of issues confront renewable energy development; a lack of national infrastructure and the limited regulatory framework of the Oslo Accords are both barriers to investment.

How many homes in Palestine use solar energy heaters?

Over half of all households in Palestine utilise solar energy heaters, although only 3% of houses depend on it as their main source. A 710kw photovoltaic plant was commissioned in September, 2014 in the vicinity of Jericho; it is the largest plant in Palestine to date.

How to solve the current energy issues in Palestine?

To solve the current energy issues in Palestine, the following recommendations are proposed to reduce the dependency on imported energy generated from non-renewable sources.

How much wind energy is used in the Palestinian territories?

It has been estimated that wind energy has the potential to account for 6.6% of energy usage in the Palestinian Territories.

Clean. We are leading the industry with our investments in technologies that make our core operations cleaner and more sustainable, allowing us to achieve energy efficiency savings and a 40% reduction in GHG emissions by 2030, five years ahead of schedule, while innovating to develop sustainable business models and build clean communities.

LOS ANGELES, March 17, 2021 /PRNewswire/ -- Southern California Gas Co. (SoCalGas) today announced that last year, the company's energy efficiency programs helped conserve more energy than any other natural gas utility in the U.S. The utility invests more in energy efficiency than any other natural gas local distribution company in the country and currently operates the ...
