Who is Solis solar?

We should start our review by explaining a bit more in-depth what Solis is and how the company came about as one of the rising promises in the solar industry. It was established in 2005, and after a few decades, is already listed among the largest manufacturers of solar inverters and PV solutions.

Where are Solis solar inverters used?

So, let me put it this way, Solis Inverters are being used at China's Shanghai Expo (Shanghai, China) and also at France's Eiffel Tower; surely, they could have used any other solar inverter, but Solis's inverter is so reliable and validated that they are not only being used all over the world but also at high profile places.

Is Solis a good inverter?

Even at a low price, you can get great quality inverters that can compete with inverters like Fronius. Yes, you heard that right! We assure you that Solis certainly meets the standard of a premium inverter which is perfect for your property. So, if you are on a budget but want an A-grade inverter, you definitely should give Solis a try.

How much does a Solis solar inverter cost?

Solis-3P15K-4G 15 kW : \$1,600 - \$1,700 Warranty is perhaps one of the few Solis inconveniences. While top PV solar inverters generally guarantee at least 10 years, and in the best-case scenario, even 25 years, Solis stays at a quite low 5 year warranty for most of its products.

What are the different types of Solis Sun solutions?

Solis sun solutions are many and varied, so for your convenience, we are going to distinguish three main categories: single-phase inverters, three-phase inverters, and, finally, energy store ones. The company also sells several accessories, such as data logging sticks, boxes, RF sticks, and RF gateways, and export power managers.

Does Solis sell solar products in Australia?

As Solis does not believe in compromising the quality and distribution of the products, it does its bartering through one of the top 3 retailers in Australia, which also includes a few top specialist solar wholesalers.

The S6 (Series 6) hybrid energy storage string inverter is the latest Solis US model certified to IEEE 1547-2018, UL 1741 SA & SB, and SunSpec Modbus, providing economical zero-carbon power from an all-weather (Type 4X / IP 66) high-efficiency PV string inverter. This hybrid inverter can be DC-coupled to a variety of batteries, enabling a versatile off or on-grid solution.

S6-GR1P(2.5-6)K-S series inverter is designed for residential PV plants. The maximum input current per string is 14A, which is compatible with high-efficiency modules and bi-facial modules. Compact and lightweight design, bring easy installation. The protection level is increased to IP66. A variety of intelligent protection functions make home power supply safe and secure.

Solis Three Phase Grid-Tied Inverter / 10 MPPTs, max. efficiency 98.7% / String current up to 21A, perfectly match large current bifacial modules More S6-GC(50-75)K-LV
