

Soltaro aio2 Laos

What is a soltaro aio2 battery storage system?

The Soltaro AIO2 battery storage system is designed to be wall mounted, look good and take up less space in your home. Our contemporary designs can be showcased and will be something you want to show off, not hide away (unlike some systems we could mention).

How many kWh is a soltaro aio2?

The Soltaro AIO2 is available in 5kWh or 10kWh options. With the ability to expand 3 times the initial capacity. We build our systems with flexibility and ease of use in mind, regardless of home size, position or existing PV array. We have a system or battery to work for every home.

Why should you choose soltaro aio2?

As the AIO2 incorporates MPPT technology, it will always allow you to get the best out of your solar PV system. When grid-connected, or connected to a local micro-grid, the Soltaro AIO2 can be connected in parallel. This allows your system to be modular and expandable as your energy storage needs change. The batteries are also modular.

What is a soltaro battery?

Soltaro offers two flagship battery products in Australia, the AIO2 and the newer AIO3. Both series feature LiFePO₄ (LFP) chemistry with over 10,000 cycle life, ensuring long-term durability. These batteries are All-in-one Energy Storage Systems (ESS) designed to cater to both on-grid and off-grid applications.

Can a soltaro aio2 be connected in parallel?

When grid-connected, or connected to a local micro-grid, the Soltaro AIO2 can be connected in parallel. This allows your system to be modular and expandable as your energy storage needs change. The batteries are also modular. You can add more battery storage at any time to expand your storage capacity should your needs change.

Can a soltaro aio2 be used on-grid?

The Soltaro AIO2 can be used both on-grid and off-grid. It is also capable of being used for an on-grid battery backup. This gives the AIO2 the ultimate flexibility for homes and small businesses who need to ensure they don't lose power when it matters most.
