What is the energy source in Somalia?

Most of the energy in Somalia is from charcoal and wood, and 90% of the country does not have access to electricity. [5]^Seizing Power - Somalia's alternative energy sector holds huge potential..

Does Somalia have solar power?

The Stimson Center explains that "Somalia has the highest resource potential for onshore wind power in Africa and the country experiences 3,000 hours of sunlight per year with daily solar radiation ranging between 5-7 kWh/m<sup>2</sup> per day, which equates to strong solar photovoltaic electricity generation capacity."

What happened to the energy infrastructure in Somalia?

When the 1991 uprising threw Somalia into a lasting civil war, the nationalized energy infrastructure was completely privatized overnight without regulation. What happened immediately was a total blackout with almost no electricity accessible to the country.

How much does energy cost in Somalia?

Depending on the region, the price can vary from \$0.30 per kWh to \$1.00 per kWh, starkly contrasting neighboring Ethiopia's price of \$0.06 per kWh. The scorching and consistent sunshine combined with ideal windy conditions means Somalia holds great renewable energy potential.

How can BECO's new solar power plant help Somalia?

Because Somalia struggles with a lack of electricity and high electric costs, BECO's new solar power plant has the potential to positively impact many people's lives. When it opened, the power plant had the capacity to produce 8 MW.

Can BECO's solar power plant lift Somalis out of poverty?

BECO's solar power plant could have a significant impact on Somalis, lifting many out of poverty. Lack of access to electricity is widely cited as a large contributor to poverty. Without electricity, families don't have a non-polluting source of energy for cooking. Refrigerators are unusable. Children can't do their homework after dark.
