

Speech at the energy storage industry business matchmaking meeting

What is the battery and energy storage Conference?

September 24, 2025 to September 25, 2025 The Battery and Energy Storage Conference will engage scientists, engineers, and policy makers working in the fields of energy storage and relevant technologies to identify, communicate, and explore current advancements in storage materials, devices, and systems.

Why should you attend the energy storage Conference 2025?

On-site Registration Rates Began Thursday, September 18, 2025 Attending this conference will not only keep you informed about the latest trends and developments, but also position you to contribute meaningfully to the advancement of energy storage technologies. Join us to connect, learn, and lead the way in transforming the future of energy:

How do energy stakeholders prepare for the energy transition?

Energy stakeholders need to prepare today to capture the business opportunities in energy storage and develop their own business models. In the energy transition, new players offering intermittent power supply have disrupted the old business models of utilities. The rise of storage technology will again lead to a shift in the industry.

Do energy storage technologies compete with other solutions?

Energy storage technologies compete with other solutions to deliver or absorb power when needed. Existing solutions, like grid expansion or more interconnections, the establishment of a capacity market for gas-fired power plants or strategic reserves, still receive a great deal of attention from policy makers, regulators and system operators.

Can I apply for financial support to attend the battery and energy storage Conference?

Thanks to the generous support of the AIChE Foundation, student and post-doc attendees have the opportunity to apply for financial support to attend the Battery and Energy Storage Conference! Awardees will receive complimentary registration as needed. Did you know that annual AIChE memberships offer great discounts on conferences and events?

What is the Energy Storage Summit?

Please try again later. 2026 marks a defining moment not only for Europe's energy storage sector, but for the global energy transition as a whole. The Energy Storage Summit will spotlight the critical role storage plays in achieving net zero, while also addressing the challenges and opportunities shaping markets worldwide.

Why WBE The World Battery & Energy Storage Industry Expo (WBE) is a leading global platform showcasing the latest advancements in battery and energy storage technologies. Covering the ...

Speech at the energy storage industry business matchmaking meeting

At the end of the meeting, leaders from the Economic and Information Bureau of Longquanyi District introduced the new energy storage support policy to all attending enterprises. This ...
