

How much solar energy does Burkina Faso have?

larly solar energy. Burkina Faso benefits from daily sunlight of 5.5 KWh/m²for 3000 to 3500 hours per year,with a uniformly distributed solar resource across the national territory,yielding an

How is energy used in Burkina Faso?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

What are the different types of energy transformation in Burkina Faso?

One of the most important types of transformation for the energy system is the refining of crude oil into oil products, such as the fuels that power automobiles, ships and planes. No data for Burkina Faso for 2021. Another important form of transformation is the generation of electricity.

Does Burkina Faso have geothermal potential?

No study has been conducted to assess the geothermal potential of Burkina Faso(REEEP,2012). Annually,Burkina Faso receives about 3,000-3,500 hours of peak sunshine and this has the potential to generate an average of 5.5 kWh/m²/day.

Is Burkina Faso a good place for wind energy?

Burkina Faso's location on the west coast of Africa is not ideal for wind energy. The average wind speeds recorded are between 1 and 3 m/s,with the faster speeds recorded in the northern parts of the country. Although this is rather low,it is currently being used to support small-scale water pumping and desalination systems (REEEP,2012).

How has Burkina Faso changed over the years?

Burkina Faso has made remarkable progress in recent years,with an increase in installed capacity from 324.6 megawatts (MW) in 2017 to 410 megawatts in 2019. The share of renewable energy also surged from 9.4% in 2015 to 18.36% in 2019.
