Will Mexico be key to the development of lithium batteries?

We believe Mexico will be key to the future of the development of lithium batteries as home to the world's largest single lithium field - "La Ventana" in Sonora. The country likely holds around 17 other deposits, across Baja California Sur, Coahuila, San Luis Potosí, Sonora and Zacatecas, that are largely undeveloped.

Why is Mexico developing a hybrid solar power plant?

In response to more frequent blackouts, Mexico recently developed hybrid plants that have both a solar power generating capacity and battery storage capabilities. As Mexico expands its solar market, we expect companies to increase their investment in battery storage operations to optimize the solar power generated across the country.

What is a battery energy storage system?

Battery energy storage systems (BESS) enable the storage of power from the National Grid or renewable sources that include wind and solar. The industry offers a wide range of BESS options, from large containerized units for businesses to smaller 5kW batteries for homes.
