Does Sun Power Energy have a PV project pipeline in Poland?

Sun Power Energy has a PV project pipeline in Poland that exceeds 1GW, Sonnedix said in a statement. Poland is the second entry into a new market by Sonnedix in recent months, after its first acquisition in Germany of an operational portfolio of 5.6MW, in December 2021.

What is solar energy in Poland?

Solar energy in Poland includes the production of solar thermal energy and solar photovoltaics. By the end of 2021, there were around 3,000,000 square metres (32,000,000 sq ft) of installed solar thermal collectors which in Poland are primarily used for heating up household water.

Does Sonnedix have a solar project in Poland?

LONDON, UK - Sonnedix, the global solar independent power producer (IPP), has acquired Sun Power Energy, a solar PV developer in Poland with 20 professionals based in Warsaw. The deal gives Sonnedix close to a 1GW development pipeline across Poland and is a springboard for further expansion into a new European market.

Is Sun Power Energy a good investment for Poland?

"The Sun Power Energy platform acquisition aligns perfectly with our growth strategy for Europe; we are gaining an excellent local team and an impressive pipeline as a catalyst for our ambitious growth strategy for Poland," said Axel Thiemann, CEO of Sonnedix.

Does Poland have a solar industry?

The solar industry in Poland is driven by government incentives, favorable solar conditions, and the country's commitment to renewable energy. With ongoing efforts to promote solar power, Poland is expected to continue its expansion in the solar industry and contribute to its overall energy transition.

How much solar power will Poland have in 2022?

Solar power is expected to play a crucial role in achieving these targets. According to the European Commissioner for Energy report published at the end of August 2022, over 20 GW of renewable energy was installed in Poland. 11 GW came from solar installations.
