You can't get more Dutch than a good old-fashioned windmill. The enterprising people of the Netherlands figured out how to convert wind into useable energy many centuries ago, and they put the wind to work in countless ways: producing mustard, paints and gin, sawing thick tree trunks into straight planks, keeping the polders dry, and more.

The adoption of energy from renewable sources draws closer to the centre by the second, and The Netherlands is not excepted from this advancement. While fossil fuels remain the dominant energy source in The Netherlands, the growth of renewable energy (RE) in the country over the past decade has gained impressive momentum.

Sun Life's rise to the top was the culmination of wholehearted and collaborative efforts of all the members of the Sun Life family.
