

Sunvolt energy Tajikistan

Does Tajikistan have a solar power plant?

The project also includes a hybrid energy storage power plant rated for 180-kilowatt hours. The new solar plant is a direct result of successful cooperation between the Government of Tajikistan, USAID, and Pamir Energy Company.

How much solar energy can be used in Tajikistan?

Preliminary calculations of the Ministry of Energy of Tajikistan have shown that the potential for the use of solar energy is 3,103 billion kWh per year. This amount would be enough to cover the winter power shortage partially in Tajikistan in regions of the country where 70% of the population lives.

Is solar energy a viable alternative to electricity in Tajikistan?

According to the Agency of Hydrometeorology of Tajikistan, the duration of sunshine in the country is 2100-3166 hours per year, and the number of sunny days per year ranges from 260 to 300. This provides great opportunities for the use of solar energy as an alternative, especially in mountainous regions where there are no power lines.

Is solar energy a good investment in Tajikistan?

In Tajikistan, there are no favourable conditions for the widespread use of solar energy or for attracting investment in this sector. This is happening amid constant energy shortages and a crisis in the country's electric power system. Solar panels in Dushanbe. Photo: CABAR.asia Tajikistan is one of the most vulnerable to climate change countries.

Can wind energy compete with Tajikistan's hydropower potential?

Given this data, we can say that wind energy can compete with the country's hydropower potential. Judging by information from the Ministry of Energy of Tajikistan, there are only 9 wind turbines with a total capacity of 5.1 kilowatts and 2,433 solar generators with a total capacity of only 8.87 kilowatts in the country.
