Why should Tajikistan invest in hydropower?

Tajikistan's geographic proximity to some of the world's fastest-growing energy markets means that investing in developing its hydropower potential can contribute to regional energy security and the clean energy transition, in addition to addressing Tajikistan's high vulnerability to climate change and natural disasters.

Is Tajikistan moving its energy sector towards more reliability?

With an aging electricity supply that relies almost entirely on one source of power generation, hydropower, Tajikistan has a uniquely unstable power supply that has caused energy shortages and rolling blackouts for decades. Now, Tajikistan appears to be moving its energy sector towards greater reliability and sustainability.

What is the energy sector of Tajikistan?

The energy sector of Tajikistan includes several entities. The electric power is the responsibility of the State-owned joint stock company Barqi Tojik, which entirely controls production, transportation and distribution of electricity in Tajikistan.

Why is Energy Independence important in Tajikistan?

The need for energy independence is a top priority in Tajikistan, with currently over 90% of oil and gas being imported from neighboring countries within Central Asia. The Tajik government has put a priority on the development of domestic resources. There are two oil and gas basins in Tajikistan.

Does Tajikistan have thermal power?

It has relatively little thermal generation. In 2019, 93% of its generation was from hydro and 7% was from coal-fired capacity. Tajikistan has limited sources for heating other than electricity which accentuates winter peak demand and deficits. IEA. Licence: CC BY 4.0 IEA. Licence: CC BY 4.0

How much electricity does Tajikistan produce?

Tajikistan has 4.4 gigawatts (GWe) of generating capacity, about 90% of which is hydroelectric. A major portion of this hydroelectric capacity is used in aluminum production, which consumes 40% of all the country's electric power. Tajikistan produces practically no oil, gas, or coal of its own.

Supreme Energy is a provider of heating and cooling services. It offers automatic oil and propane delivery, complete HVAC equipment installations, emergency boiler and furnace repairs, electricity and natural gas brokerage, oil tank installations and removal, etc for home and business.
