More battery is used to supply electricity during UPS mode. So the biggest con is that if the mains don't supply standard 220 V-240 V or 110 V for charging, it won't take input.

Mr. Jan, a Dutch citizen, previously resided in the UK where he co-founded an electricity company, amassing over 25 years of experience in the field. With ex...

The UPS and inverter both use when power outages occur in the electrical system. One of the major differences between the UPS and inverter is that the switching of UPS from the main supply to the battery is very immediate whereas in inverter the switching from mains supply to battery takes sometimes. The UPS and the Inverter are differentiated below in the comparison chart ...
