How much do solar panels cost?

In addition, the specifications of the panels (such as power) and the cost of installation also play a role. On average, you pay around EUR500 to EUR600 per solar panel, including installation. The cost of solar panels depends on the number of panels and the power per panel. In general, the more panels you buy, the cheaper the price per panel becomes.

Are solar panels a good investment in the Netherlands?

An average-sized installation of 12 solar panels produces about 4000 kWh a year when you are buying solar panels in the Netherlands. With electricity prices at 30 cent p. kWh, that's EUR 1200,- saved. An installation of EUR 5500,- means an RUI of less than 5 years. There are very few investments which are this safe with the same RUI.

How does the Dutch government support solar panels?

The Dutch government recognizes the importance of a green transition and actively supports residents and businesses in their solar endeavors. Here are some ways the government lightens the financial load: Periodically, the government rolls out subsidy programs to offset the initial costs of solar panel installation.

Can you install solar panels in a Dutch home?

Contemporary Dutch homes, with their expansive roofs and minimalist design, offer a wonderful canvas for solar installations. These homes often allow for a more extensive array of panels, maximizing energy capture. The goal is not just to add solar panels but to integrate them in a way that complements the beauty of Dutch architecture.
