Know what questions to ask before leasing your land for a solar farm. If you're a farmer or landowner looking to lease your land for a solar farm, you may have a ton of questions about the process. This is completely normal, as most people don't have enough experience with the solar industry to make an informed decision to lease their land for a solar project.

These are just some of the key points a landowner must consider when discussing a potential land lease with a solar company. Of course, there may be other important considerations, but asking these questions can clear up a lot of key aspects of the lease. Again, you should review everything with a legal professional before committing to a solar ...

Across the State, developers are looking for parcels of land -- starting at approximately 10 acres -- that are suitable for solar arrays. Not every property is ideal for installing large solar arrays due to property limitations, availability of electric distribution or transmission lines, or zoning requirements, but a participating contractor ...
