U S Outlying Islands solar full roof

The far-flung Matsu islands lie around 170km or so north-west of Taiwan's main island, close to the coast of mainland China. There are well over a dozen islands here, each with its own individual character and culture, but the main ones are Nangan - the largest of the Matsu islands, and once a notorious pirates' lair - Beigan, Juguang and Dongyin.

The community is 95% residential - [there will be] a thousand homes at full build in 2020. 600 families live there now. The community centre doesn't have the mechanicals on the roof; they just have a gentle, grassy slope up to the roof, where hundreds of residents could gather, and the roof is above the flood line.

In 2022, the average price of electricity paid by U.S. Virgin Island residents was almost three times higher than the U.S. average, at 41 cents per kWh.* Add a Battery. Power your most needed lights and appliances during a power outage.

The push to install rooftop solar panels in neighborhoods across Puerto Rico is paying off, as the batteries connected to these panels are being used to provide backup power for the national grid.
