Is CIP building a GWh Bess project in Scotland?

Denmark-based private investor CIP has taken a final investment decision (FID) and begun construction on a 500MW/one gigawatt-hour (GWh) BESS project, Coalburn 1, in Coalburn, Scotland. The project is being developed by CIP in partnership with UK-based energy storage developer Alcemi and will be one of the largest of its kind in Europe.

What is the Coalburn energy project & why is it important?

The project will occupy 15.8ha of land and is located east of Coalburn within the administrative boundary of South Lanarkshire Council. It will reduce the requirement for fossil fuel-based power generation during times of peak demand. This will reduce carbon dioxide emissions while offering balancing services to bring down costs for consumers.

Why should the US Virgin Islands own solar assets?

The US Virgin Islands should invest in solar assets for enhanced portfolio diversification and risk mitigation. WAPA ownership guarantees coverage by WAPA and FEMA during natural disasters, eliminating uncertainties (1. Enhanced Portfolio Diversity: WAPA diversifies its energy portfolio, ensuring a more resilient and sustainable future).
