The iGyro 3xtra ushers in the second generation of the iGyro family. The new iGyro 3xtra boasts a completely revised regulatory algorithm and set-up procedure, expanded features and enormously enhanced performance, making it the new "State of the Art".. In contrast to its predecessor - the 3e - the new iGyro no longer incorporates delta and V-tail mixers.

PowerBox CORE - the new generation of pro-class radios. Lead times vary on color, contact us for more information! PowerBox-Systems manufactures high-quality power supply equipment, and has now been working for more than a year on its own independent radio control system. On the face of it we may seem a little tardy in introducing a new 2.4 GHz RC system, but upon closer ...

Power Systems Choose below the type of power system that is suitable to your airframe. Electric Ducted Fans (EDF) Power Systems are used in RC electric Jets, and Propeller Power Systems are used on just about every other type of RC Airplane. ... United Arab Emirates (USD \$) United Kingdom (USD \$) United States (USD \$) Vietnam (USD \$) 1-224-633 ...

Product Description The V-Regulator is a compact, high-performance voltage regulator which is ideal for any model where standard servos are to be operated in conjunction with a Lithium battery. In this way fairly small to medium-sized fixed-wing model aircraft and helicopters can be equipped, or re-equipped, with moder

The PowerBox Pioneer is the latest development of a 14-channel power supply unit without voltage regulation, designed for HV servos. Since the unit has no voltage regulators, nor the large heat-sink surfaces required for them, it offers ultra-compact dimensions. Even so, the Pioneer still provides redundancy, as is the standard for all power supply units made by PowerBox-Systems.

Dear PowerBox pilot, At PowerBox-Systems our service does not stop when you purchase an item. Our products are constantly being improved and updated. We urge you to register your PowerBox here to ensure that you too can benefit from new functions and improvements as quickly as possible. Once you have registered your product, we will keep you ...

The PowerBox Evolution is always the first choice when a small, robust battery backer system is required: the typical range of applications extends from warbirds to 3D aerobatic models and even to jets. The first series of the Evolution was introduced back in the year 2004, and since that time it has been continuously developed and improved.

Solenco Powerbox(TM) has all the components required for integrated control of electricity and heat. Its only module (stack) contains both the electrolyzer and the fuel cell to make it more compact and cost-effective. Powerbox is also provided with a water purifier and a control system with remote access option.
