

# Upb energy India

Who is UPB energy?

The experts of UPB Energy have more than 20 years of experience in design and maintenance of cogeneration and trigeneration modules. The competent team is composed of experienced engineers, technical staff and service engineers.

What services does UPB offer?

UPB also offers cogeneration and trigeneration module servicing according to the highest standards. The cogeneration and trigeneration station production facility is located in Liepaja, Latvia and is the only production site of this type in the Baltics.

Where is upenergy based?

Almost 90% of the UpEnergy Team is based on the ground across 8 African markets. Additionally, we have projects under development in Latin America and Asia. UpEnergy is proud to announce Tanzania's first-ever Article 6 authorization for carbon credits, a landmark moment in international climate finance.

What are upenergy projects?

UpEnergy projects also support those most vulnerable within agricultural supply chains through targeted carbon removal projects, such as Biochar and Agroforestry, designed not only to mitigate climate change but also deliver value back to communities at risk.

Why should you choose UPB?

The focus of UPB is economic operation of the power equipment and the fuel required for production of power is used especially efficiently providing additional benefits to the customers. UPB also offers cogeneration and trigeneration module servicing according to the highest standards.

Why should you choose upenergy?

This ensures we deliver projects with high integrity, measurable impact, and significant social benefit. UpEnergy fights energy poverty by delivering clean, life-improving technologies such as electric cooking, safe water systems, and emission-reducing charcoal stoves in local communities across Africa and beyond.

Double amount of export contracts and consolidated turnover reaching EUR 117 million -- this is the last year's balance of the industrial group of companies UPB. 2014 was the best year during the history of the company, claims Uldis Pilens, the ...

UPB offers environmentally friendly and sustainable energy solutions, using renewable energy resources and biogas. We can provide full-cycle construction of boiler houses, biomass cogeneration plants and other energy facilities.
