On the remote island of Malekula, the second-largest island in Vanuatu, a new solar micro-grid is changing the lives of over 2,800 people -- boosting local development while contributing to Vanuatu's sector specific target

Vanuatu renewable energy consulting

of transitioning to close to 100 percent renewable energy for electricity by 2030.

renewable energy equipment (solar PV, wind, biomass) and spare parts. Highest proposed Develop an electrification plan for renewable energy in remote islands (this study) Immediate completed Commission a national study on biomass resource and use in Vanuatu, and develop a national biomass strategy (with Departments of Forestry and Agriculture)

100% renewable energy in the electricity sector by 2030. This target would replace nearly all fossil fuel requirements for electricity generation in the country and be consistent with the National Energy Road Map (NERM) target of 65% renewable energy by 2020. This contribution would reduce emissions in the energy sector by 72Gg by 2030.

Our track record demonstrates a consistent delivery of successful consulting services to all stakeholders in the electricity sector. Global insight and expertise We harness global insights to enhance every project, collaborating internationally to achieve the best outcomes for our partners.
