

Wind energy supplier Slovakia

Is Slovakia rethinking investing in wind parks?

State-owned energy supplier SPP recently announced plans to build two wind park projects, suggesting Slovakia is reconsidering investing in wind parks as, amid the ongoing energy crisis, activist obstruction and long environmental processes are no longer much of a deterrent.

Are wind turbines a problem in Slovakia?

In Slovakia, the construction of wind turbines has long been met with harsh resistance, with opponents arguing that they disrupt the natural landscape and that their supply is uneven. The energy crisis and the ensuing drive to drop Russian energy dependence are causing a change in attitude.

Where is wind energy found in Slovenia?

A northwest to southeast band of higher potential wind energy is found across far southwest Slovenia, roughly between Gorizia, Italy and Rijeka, Croatia. Unlike the Atlantic Ocean and North Sea offshore areas of western and northern Europe, the offshore wind resources for Slovenia in the Adriatic Sea are not that much greater than onshore.

With a drive for a net-zero future, along with ongoing advances in wind turbine technology, wind energy is an increasingly attractive and affordable proposition. As the trusted partner for wind energy developers, investors and operators worldwide, we unlock solutions covering the entire project life cycle of wind development.
