Caledonia Offshore Wind Farm, developed by Ocean Winds, has funded a new pre-apprenticeship programme which aims to address a major skills gap in fabrication and welding which is critical to the growth and success of a sustainable offshore wind supply chain in Scotland.

Wind power now represents a major and growing source of renewable energy. Large wind turbines (with capacities of up to 6-8 MW) are widely installed in power distribution networks. Increasing numbers of onshore and offshore wind farms, acting as power plants, are connected directly to power transmission networks at the scale of hundreds of megawatts. As ...

In this global energy transition, wind power plays a crucial role. It is one of the most cost-efficient, abundant and environmen-tally friendly energy sources. But conventional wind technology is unable to exploit this resource where it is most potent: at high altitudes. Now, we offer an airborne system that revolutionizes how the wind

Caledonia will join Ocean Winds" other projects in the Moray Firth, Moray East and Moray West, and is expected to double offshore wind generation in the area. According to Ruaridh Danaher, Caledonia Onshore Consent Manager, the EIA report, developed over three years, reflects both onshore and offshore infrastructure needs, based on substantial ...

This mode of operation, called "grid-forming", allows minimal use of fossil fuel and maximises the contribution of renewable energy in New Caledonia. The integration of the energy storage unit is part of the second phase of Lifou 100% Renewable Energy by 2020. The first stage comprised the installation of wind and solar energy generation ...

In 2022, New Caledonia's electricity consumption was heavily reliant on fossil fuels, making up more than 80% of the total energy mix. Coal was the largest contributor within this category, accounting for about half of the total electricity use. On the other hand, low-carbon or clean energy sources played a smaller role, constituting just under 20% of the electricity consumption.

Wind Systems Magazine. inFocus. Showcasing offshore's successes. ... The wind-energy sector, while championing... DIRECTION. BOEM, DOD agree to collaborate on offshore wind. December 15, 2024. ... Vestas secures Equinor order for New York offshore. October 15, 2024.

enwitec, one of the leading providers of system technology for photovoltaic systems, is expanding its product range with two revolutionary new products: the PowerShield 500 and the PowerShield Pro 1100. These innovative solutions offer comprehensive grid and system protection for PV systems and set new standards in the industry.

Launch of local pre-apprenticeship programme aims to equip next generation of offshore wind energy workforce with key skills Read on. Nov 26 Meet Surabhi Verma, Onshore Consents Specialist ... The government of New Caledonia, a French overseas territory in Polynesia, has given the green light to the construction of a 50-MW/150-MWh battery energy storage system (BESS) by domestic renewable power producer and developer Akuo.

"We look forward to keeping existing wind parks running and exploring new ones with Fortum for the benefit of Fortum, Vestas and Europe's energy system." With this settlement achieved, the two companies have come to a compromise that enables them to collaborate once more on new energy projects as well as on existing wind parks.

Wind is one of the best renewable sources of energy. Although a complete shift from fossil fuel-based energy to wind energy isn't a viable task for any country no matter the size, every little bit helps. As New Caledonia accommodates over 300,000 Australian tourists a year, we have an unspoken obligation to assist them in protecting our planet.
