

Windward energy Montserrat

Can wind power Montserrat?

The new report evaluates two studies conducted to assess the viability of wind as a key source for powering Montserrat. A Wind Power Potential Study was conducted in 2008 by Wind Business Support and a Wind Desktop Study was produced in 2019 by the MCWLE Energy Unit.

Can Montserrat install a 4 MW wind farm?

The task force's report said the desktop wind assessment study commissioned and conducted by the Montserrat energy unit in 2019, investigated the feasibility of installing a 4 MW wind farm at six different locations around the island. The study found that the capacity factor varied between 20% to 35% for the selected site.

What does the Montserrat Energy Department do?

To collaborate with various regional and international development partners to facilitate the implementation of Energy Efficiency, Energy Conservation and Renewable Energy programs and projects. The Montserrat Energy Department is launching the next phase of its Efficient Energy initiative by distributing 250 Plug-In Meter Readers.

How much does electricity cost in Montserrat?

Montserrat's utility rates start at \$0.53 per kilowatt-hour(kWh) for residential customers, which is above the Caribbean regional average of \$0.33/kWh. Like many island nations, Montserrat is almost entirely dependent on imported fossil fuels, leaving it vulnerable to global oil price fluctuations that directly impact the cost of electricity.

How many plug-in meter readers are available in Montserrat?

The Montserrat Energy Department is launching the next phase of its Efficient Energy initiative by distributing 250 Plug-In Meter Readers. As part of a collaborative

Will a costly land acquisition cost Montserrat's energy consumers?

Costly land acquisition will increase the capital expenditure (CAPEX) cost of any RE project and, in turn, become a hindrance in allowing low-cost energy rates (\$kw/h) to Montserrat's energy consumers," the report stated.
