

Yemen aramis energy

Is Yemen an energy importer?

Yemen is not a net energy importer, but it has the lowest level of electricity connection in the Middle East, with only 40% of the population having access to electricity. Rural areas are particularly badly affected.

What is the energy situation in Yemen?

Energy in Yemen refers to the energy and electricity production, consumption, and import in Yemen. Yemen is a net energy exporter. The primary energy use in Yemen was 87 TWh in 2008 and 88 TWh in 2009, which equates to 4 TWh per million people.

What are the major energy problems in Yemen?

Yemen is facing serious energy problems, such as circulation obligations, line losses, obsolete transmission lines, and electricity theft among the rural population (71%), resulting in 8-10 h of power shortage.

Does Yemen have electricity?

Even before the conflict in 2015, most of Yemen's population was deprived of basic electricity services. Yemen has the lowest electricity access rate in the Middle East and North Africa. The power obtained from the grid or off-grid sources is estimated to be 40 to 60% (MOEE).

Is there a shortage of electricity in Yemen?

Yemen is experiencing a severe shortage of several gigawatts of electricity, according to the Yemen Public Electricity Corporation (YPEC), which is a semi-independent arm of the Yemen Ministry of Electricity and Energy (YMEE) (World Bank 2009).

Is Yemen a low-income electricity user?

From the above data, the per capita electricity (PEC + private purchase) is about 335 kWh/person/year, that is, 918 Wh/person/day, which is very low, so the Yemeni population is once again classified as a low-income electricity user.
