

Yorkshire energy systems Wallis and Futuna

A new survey from the Green Alliance and Regen SW shows that Selby in North Yorkshire produces the most renewable energy of any area in England and Wales. As you can see, Drax's home tops the chart by a large margin. That's because between three and four per cent of the UK's electricity is generated from sustainable biomass here at Drax power station.

The UK's Green Nation has unveiled plans for a solar and energy storage project, aiming to contribute up to 750MW to the country's National Grid. Called Whitestone Solar Farm, the solar facility is located between Rotherham and Doncaster in South Yorkshire and is in the preliminary stages of development.

The market for battery energy storage is estimated to grow to \$10.84bn in 2026. The fall in battery technology prices and the increasing need for grid stability are just two reasons GlobalData have predicted for this growth, with the integration of renewable power holding significant sway over the power market.
