

Why is Zambia embracing solar energy?

Zambia is one of the nation's leading the charge in embracing solar energy. Zambia's solar energy industry has undergone a tremendous transition in 2023, opening the way for a future that is cleaner, greener, and more robust. The potential for solar power generation in Zambia is enormous due to the amount of sunlight.

How can Zambia improve public access to solar energy?

To overcome this obstacle, the Zambian government has been investigating cutting-edge funding strategies to increase public access to solar energy in collaboration with foreign organizations. Pay-as-you-go programs, lease choices, and user-driven community projects are a few examples of these.

What is the potential for solar power generation in Zambia?

The potential for solar power generation in Zambia is enormous due to the amount of sunlight. The government and participants in the corporate sector have taken action to take advantage of this opportunity and tap into this renewable resource. There is a lot of potential despite the nation's existing solar capacities, which are close to 100 MW.

Who owns 50 MW of solar power in Zambia?

In 2022, the Southern, Western, and Luapula provinces of Zambia's Zambia Electricity Supply Corp. (ZESCO) have issued a call for tender for the development and construction of 50 MW of PV facilities, 90% of the infrastructure will be owned by the selected developer, and the other 10% will be held by the state-owned utility, ZESCO.

Which data layers were used for spatial analysis of solar resource in Zambia?

Final corrected GHI and DNI data layers were used for spatial analysis of solar resource in Zambia, and for calculation of secondary data layers: diffuse horizontal irradiation (DIF), global radiation on optimally tilted surface (GTI) and potential photovoltaic production (PVOU).

Where are the Zambia Meteorological Stations located?

The stations are located within the premises of Zambia Meteorological Department (ZMD), Zambia Agriculture Research Institute (ZARI) and School of Agricultural Sciences at University of Zambia (UNZA) over years 2015 to 2017. The project was funded by the World Bank.

The Ilute solar park will add to the country's portfolio, including the 54 MW Bangweulu and 34 MW Ngonye parks, which have been operational since 2019. A 200 MW solar plant is also under construction in Serenje. These efforts highlight Zambia's drive to diversify its energy sources. However, Zambia still faces energy challenges.
